Question 1. (Multi Select)

You execute this command:

Sufficient storage is available in filesystem /u01.

Which two statements are true about the BIG_TBS tablespace?

- A: AUTOEXTEND is possible for the datafile
- B: It must be bigger than the largest SMALLFILE tablespace
- C: Additional data files may not be added
- D: It will be a dictionary-managed tablespace by default
- E: It will always have a 32K blocksize

Answer: A, C

Question 2. (Single Select)

Which statement is true about the INTERSECT operator used in compound queries?

- A: Multiple INTERSECT operators are not possible in the same SQL statement
- B: INTERSECT is of lower precedence than UNION or UNION ALL
- C: It ignores NULLs
- D: It processes NULLs in the selected columns

Answer: B

Question 3. (Single Select)

In the spfile of a single instance database, LOCAL_LISTENER is set to LISTENER_1.

The TNSNAMES.ORA file in \$ORACLE_HOME/network/admin in the database home contains:

Which statement is true?

- A: Dynamic service registration cannot be used for this database instance
- B: The LREG process registers services dynamically with the LISTENER_1 listener
- C: LISTENER_1 must also be defined in the LISTENER.ORA file to enable dynamic service registration

D: There are two listeners named LISTENER and LISTENER_1 running simultaneously using port 1521 on the same host as the database instances

E: The definition for LISTENER_1 requires a CONNECT_DATA section to enable dynamic service registration

Answer: B

Explanation:

The listener forwards client requests to supported services. These services are dynamically registered with the listener. This dynamic registration feature is called service registration. The registration is performed by the Listener Registration (LREG) process. Dynamic service registration does not require any manual configuration in the listener.ora file.

Question 4. (Multi Select)

Which three statements are true concerning logical and physical database structures? (Choose three.)

- A: All tablespaces may have one or more data files
- B: The extents of a segment must always reside in the same datafile
- C: A segment's blocks can be of different sizes
- D: A smallfile tablespace might be bigger than a bigfile tablespace
- E: A segment can span multiple data files in some tablespaces
- F: A segment might have only one extentG. Segments can span multiple tablespaces

Answer: B, C, F

Question 5. (Multi Select)

Which two statements are true regarding a SAVEPOINT?

- A: Rolling back to a SAVEPOINT can undo a CREATE INDEX statement
- B: Only one SAVEPOINT may be issued in a transaction
- C: Rolling back to a SAVEPOINT can undo a TRUNCATE statement

D: A SAVEPOINT does not issue a COMMIT

E: Rolling back to a SAVEPOINT can undo a DELETE statement

Answer: D, E
