## Question 1. (Multi Select)

Identify two implementation strategies of changed data capture provided through ODI Knowledge Modules.

A: extracting source data to flat files

B: triggers

C: Oracle GoldenGate

D: before-and-after database image comparison

**Answer: B, C**

## Question 2. (Single Select)

How does the data flow when moving records between two servers by using Database Links and an Agent installed on a middle-tier server? (Choose the best answer.)

A: from the source database into flat files that are then loaded into the target database

B: directly from the source database to the target database

C: from the source database onto the server running the Agent and then into the target database

D: from the source database into the machine running ODI Studio and then into the target database

**Answer: B**

**Explanation:**

(https://docs.oracle.com/middleware/1213/odi/ODIUN.pdfpage 2-3)

## Question 3. (Single Select)

You must run the same mapping concurrently while avoiding clashes of ODI temporary objects. How must you implement this? (Choose the best answer.)

A: Select the Use Unique Temporary Object Names check box at the Physical Design level.

B: Create a custom Knowledge Module (KM) to handle this by using ODI variables to create unique

temporary object names.

C: Use variables in the Logical Design of the Mapping to create unique temporary object names.

D: Create a custom KM to handle this by using ODI variables defined at the Topology level to create unique temporary object names.

**Answer: D**

**Explanation:**

(https://blogs.oracle.com/dataintegration/entry/odi_12c_parallel_target_table)

## Question 4. (Single Select)

Which tables created by ODI contain error records? (Choose the best answer.)

A: ERR$

B: ODI_ERR$

C: E$

D: ERROR$

**Answer: D**

**Explanation:**

(https://docs.oracle.com/middleware/1212/odi/ODIKD/ckm.htm#ODIKD925)

## Question 5. (Single Select)

Your customer wants a project in ODI, which contains a user function, to translate commands with different syntax for different technologies but with the same functionality.

How can you achieve this? (Choose the best answer.)

A: The project must be explicitly mapped within an ODI mapping.

B: It can be defined for every technology listed in the topology.

C: An ODI procedure must be associated with it.

D: A customize knowledge module is needed.

<div style="border: 2px solid black; display: inline-block; padding: 20px;">

**Answer: D**

</div>

**Explanation:**
