## Version product

# Latest Version: 8.0

## Question: 1

What is a potential risk associated with hallucinations in LLMs, and how should it be addressed to ensure Responsible AI?

- A. Hallucinations can lead to creative outputs, which are beneficial for all applications; hence, no measures are necessary.
- B. Hallucinations cause models to slow down; optimizing hardware performance is necessary to mitigate this issue.
- C. Hallucinations can produce inaccurate or misleading information; it should be addressed by incorporating external knowledge bases and retrieval systems.
- D. Hallucinations are primarily due to overfitting; regularization techniques should be applied during training.

**Answer: C**

## Question: 2

When dealing with the risk of data leakage in LLMs, which of the following actions is most effective in mitigating this issue?

- A. Applying rigorous access controls and anonymization techniques to training data.
- B. Using larger datasets to overshadow sensitive information.
- C. Allowing unrestricted access to training data.
- D. Relying solely on model obfuscation techniques

**Answer: A**

## Question: 3

When deploying LLMs in production, what is a common strategy for parameter-efficient fine-tuning?

- A. Using external reinforcement learning to adjust the model's parameters dynamically.
- B. Freezing the majority of model parameters and only updating a small subset relevant to the task
- C. Training the model from scratch on the target task to achieve optimal performance.
- D. Implementing multiple independent models for each specific task instead of fine tuning a single model

**Answer: B**

#### **Question: 4**

What does the OCTAVE model emphasize in GenAI risk assessment?

- A. Operational Critical Threat, Asset, and Vulnerability Evaluation focused on organizational risks.
- B. Solely technical vulnerabilities in AI models.
- C. Short-term tactical responses over strategic planning.
- D. Exclusion of stakeholder input in assessments.

**Answer: A**

#### **Question: 5**

Which of the following is a potential use case of Generative AI specifically tailored for CXOs (Chief Experience Officers)?

- A. Developing autonomous vehicles for urban mobility solutions.
- B. Automating financial transactions in blockchain networks.
- C. Conducting genetic sequencing for personalized medicine
- D. Enhancing customer support through AI-powered chatbots that provide 24/7 assistance.

**Answer: D**
